SUMMARY

Brycon, LLC has performed a Phase I Environmental Site Assessment (ESA) of the City of Hermosa Beach Maintenance Yard located at 555 6th St in Hermosa Beach, California. This Phase I ESA was performed in conformance with the scope and limitations of the ASTM E 1527-05 Standard. The purpose of this assessment was to evaluate the site history, existing observable conditions, current site use and current and historic uses of surrounding properties to identify the potential presence of Recognized Environmental Conditions (RECs) in conjunction with the subject site. Exceptions to, or deletions from this practice are described in Section 1 of this report. Our conclusions are intended to help the user evaluate the “environmental risk” associated with the Site, as defined in the ASTM E 1527-05 Standard and discussed in the Introduction section of this report.

The Site is comprised of a single parcel that is approximately 1.3 acres in size (Figure 2). The current use of the Site is as a City Maintenance Yard and the proposed use of the Site is as a crude oil production facility.

RECOGNIZED ENVIRONMENTAL CONDITIONS

The goal of the ASTM E 1527-05 Standard practice is to identify Recognized Environmental Conditions (RECs) as defined in the Standard and Section I of this report. This assessment has revealed no evidence of RECs currently in connection with the property with the exception of the RECs outlined below.

The ASTM E 1527-05 Standard requires an opinion of the potential impacts of REC(s) identified on a site during a Phase I. Brycon’s opinion is rendered with respect to the REC’s potential (high, medium or low) to require remedial response based on prevailing agency requirements and our understanding of the sensitive nature of the property use. During the Phase I ESA, Brycon, LLC identified RECs associated with the subject site. Our opinion of the potential impacts of REC’s identified in this Phase I is as follows:

- REC #1:** Former landfill present onsite from the 1920s to 1950s.
- Potential Impact: High
- Explanation: Based on the results of the Phase I ESA, Brycon encountered evidence of a historic landfill on the subject site. Previous ESA identified petroleum hydrocarbon and potentially metal impacted soil within the former landfill. The landfill appears to encompass the northeastern portion of the property to a depth of up 44 feet below ground surface.
- REC #2:** Current Site Operations
- Potential Impact: Medium
- Explanation: Brycon, LLC observed current operations at which a small portion of the surface of the Site was being utilized for clean out/washing of city equipment and storage of landscape debris. These areas are not covered with asphalt and/or concrete and therefore the potential for environmental impact to the surface soils is present.

HISTORICAL RECs

The ASTM standard requires that historical RECs (HRECs) and other known or suspect environmental conditions, as defined in the Standard and in Section 1 of this report are identified in the Phase I.

- HREC #1:** Former steel underground storage tanks (USTs) and related piping and dispenser equipment were reportedly removed from the site by the City of Hermosa Beach in 1989 and 1998 and are documented in reports by GeoResearch and GEO-CAL, Inc respectively. A previous Phase II site assessment performed by ENTRIX indicated that chemicals of concern were not present in the area of the UST location.
- HREC #2:** Old Maintenance Building. Several items were noted in a previous Phase I ESA performed by ENTRIX. These include a paint room, vehicle maintenance room, a parts room and a miscellaneous storage room. Noted in the ESA was the storage of various wastes in these areas. ENTRIX recommended the completion of a Phase II ESA which included sampling and analysis within the identified areas. ENTRIX completed a Phase II ESA which included sampling in the paint room and petroleum area. The results of the Phase II ESA indicated that no chemicals of concern were present within the soil below the old Maintenance Building.
- HREC #3:** Oil Well – Stinnett #1 and associated storage tanks. An oil production well and associated tanks were located on the site. The California Department of Conservation, Division of Oil Gas and Geothermal Resources website shows the well to be plugged and abandoned. ENTRIX investigated the area as part of their Phase II ESA. The results of the Phase II ESA indicated that no chemicals of concern were present within the soil in the former oil well location.
- HREC #4:** Asphalt Batching Area. An area utilized for asphalt batching was reported by ENTRIX in a previous Phase I ESA. The area appears to be in use today as a storage area for sand and gravel. A phase II ESA completed by ENTRIX indicated that chemicals of concern were not present within the soil below the asphalt batch area.

1.0 INTRODUCTION

1.1 Purpose

This Phase I Environmental Site Assessment (ESA) was performed in conformance with the scope and limitations of the ASTM E 1527-05 Standard. The purpose of this assessment was to evaluate the site history, existing observable condition, current site use, and current and historical uses of surrounding properties to identify the potential presence of Recognized Environmental Conditions (RECs) in conjunction with the subject site.

RECs are defined by ASTM as “the presence of likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on a property or into the ground, groundwater, or surface water of the property”. In addition, the ASTM Standard requires that historical RECs and known or suspect environmental conditions be identified in the Phase I report.

The conclusions presented herein are intended to help the user evaluate the “business environmental risk” associated with the site, as defined by ASTM as “a risk which can have a material environmental or environmentally driven financial impact on the business associated with the current or planned use of the parcel”.

1.2 Site Identification

The subject studied Site is comprised of a single parcel approximately 1.3 acres in size, located at 555 6th Street in Hermosa Beach, California (Figure 2). The Site is currently utilized as a City Maintenance Yard and is proposed to be utilized as a crude oil production facility.

1.3 Scope of Services

Brycon, LLC performed an ASTM Phase I ESA on the City of Hermosa Beach Maintenance Yard which included the following work items:

1. Visual observations of site conditions and of abutting property use to evaluate the nature and type of activities that have been or are being conducted at and adjacent to the site.
2. Review of federal and state environmental database information within the specified radii from the subject property using a database service to access records. Review of topographic maps to evaluate the sites physical setting.
3. Review the City of Hermosa Beach files for historic site information.
4. Review of previous site reports prepared for the subject site.
5. Review of: Certified Sanborn maps, City Directories, topographic maps and aerial photographs of the site.
6. Interview of City employees.
7. Interpretation of information and data assembled as a result of the above work tasks and formation of conclusions regarding the potential presence and/or impact of potential areas of concern (AOCs) and RECs.

1.4 Exceptions and Deviations

Brycon, LLC completed the Phase I ESA in substantial conformance with the ASTM E 1527-05 Standard. Brycon personnel did not visit each of the adjoining parcels, however each was observed from the public thoroughfares, to the extent possible.

1.5 Report Limitations

The Phase I ESA report has been prepared exclusively for the Client. The information obtained is only relevant for the dates of the records reviewed or as of the date of the latest site visit. Therefore, the information contained herein is only valid as of the date of the report.

The Client should recognize that this report is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, a review of the specified regulatory records, and a review of the historical usage of the Site, as presented in this report. The Client should also understand that asbestos containing materials, lead containing paint, methane and mold surveys were not included in the scope of services for this Phase I ESA. Assessment for potential naturally occurring hazards such as asbestos and arsenic are also not included. No guarantee or warranty of the results of the ESA is implied. Brycon strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

2.0 SITE DESCRIPTION

2.1 Site Ownership and Location

The subject Site consists of one parcel that is approximately 1.3 acres in size and is owned by the City of Hermosa Beach. The site is located at 555 6th Street in the City of Hermosa Beach, California (Figure 2).

2.2 Site Vicinity and Description

The area in the vicinity of the property is primarily developed with industrial/commercial uses to the north, south and west with a Greenbelt/City Park built on a center street median to the east (Figure 1). The site is currently utilized as a City Maintenance Yard which includes a maintenance building, a new steel building, vehicle washout area, a construction material storage area, and a former (now abandoned) oil well location (Stinnett well). The site has been reported to be formerly utilized as a city landfill as early as the 1920s. The site is currently overlaid with concrete pads and asphalt with a small portion of the site unpaved.

2.3 Physical Setting

Subsurface explorations were not performed for this evaluation; therefore site geology and hydrogeology were evaluated on the basis of readily-available public information or references, well logs from previous explorations conducted on the site and/or based upon our experience with the subsurface conditions in the Hermosa Beach area.

Topography

The topography is relatively flat at a reported elevation of 55 feet above mean sea level. However, the area was historically more topographically varied, with the northeast portion of the site filled in over time (former landfill area).

Geologic/Hydrogeologic Information

The site is located on the Los Angeles Coastal Plain (LACP) an area that encompasses 480 square miles and is bounded by the Santa Monica Mountains to the north, the low-lying Elysian, Repetto, Merced and Puente Hills to the northeast, Coyote Creek to the east and the Pacific Ocean to the south and west (California Department of Water Resources (DWR, 1961).

The area around Hermosa Beach includes the Coastal Plain which is within the southwestern block of the Los Angeles Basin. The Newport-Inglewood uplift divides the Coastal Plain into two distinct groundwater basins: the Central Basin and the West Coast Basin. The site is located near the center of the West Coast Basin. The West Coast Basin extends from the Ballona Escarpment (Playa del Rey) and Baldwin Hills, on the northwest, to the Long Beach Plain, on the southeast.

Shallow groundwater in the area is characterized as unconfined or semi-perched and is typically found in unconsolidated Quaternary sediments less than 100 feet below ground surface (bgs). The semi-perched aquifer has been found to depths of 50 to 100 feet within the area. In general, the semi-perched aquifer is of little beneficial use due to poor water quality and low yield. In many areas of the West Coast Basin, groundwater is not detected in sediments of the semi-perched aquifer.

Historically groundwater beneath the site was reported at depths estimated at 50 to 100 feet bgs. In, 1994 ENTRIX completed environmental borings on the site and did not encounter

groundwater at depths of up to 46 feet bgs. Surface water in the area is primarily limited to the Pacific Ocean which is located to the west of the site.

3.0 PREVIOUS REPORTS AND ENVIRONMENTAL ASSESSMENTS

The site has been the subject of previous environmental evaluation by GeoResearch (1989) ENTRIX (1994, 1995) and GEO-CAL. Inc (1998). The scope and results of the previous environmental assessments, based upon Brycon's review of the previous reports, are discussed below.

The following previous reports were reviewed for this assessment. Information contained in these reports is included herein.

3.1 GeoResearch

GeoResearch completed a report outlining the closure of two 550 gallon underground storage tanks on the Site in 1989. The tanks were filled with concrete and abandoned in place as part of this project.

A total of 5 soil borings were completed to depths of 40 feet bgs, although only 3 of the 5 were identified as being pertinent to the tank closure (Borings 3, 4, and 5). A total of 18 soil samples were obtained from the 3 pertinent borings and analyzed for total petroleum hydrocarbons (TPH). The results for all 18 samples were none detected for TPH. It should be noted that analytical for the other 2 borings (12 additional soil samples) was included in an Appendix to the report, the results of which were also none detected for TPH.

The County of Los Angeles, Department of Public Works issued a closure letter with no further action required for the project on April 10, 1989.

3.2 ENTRIX, Inc.

ENTRIX - 1994

ENTRIX, Inc. completed a Phase I ESA (October 1994) on the site. The principal findings were:

- 1) Several current uses of the site may have released petroleum and/or solvents at the site. These included a maintenance building, a drum storage area, a vehicle washout area, an asphalt batching area, the Stinnett Oil well, and two underground storage tank settings. Additional sampling was recommended.
- 2) A soil gas survey was performed on underground storage tanks (USTs) located on the site. Low to non-detectable concentrations of TPH, BTEX, and VOCs were encountered, indicating a significant release from the USTs was not likely.
- 3) The site history and aerial photo study indicated several concerns including a city dump, possible spills near the Stinnett well, former above ground storage tanks (ASTs) and the former Hermosa Glass Company located on the site of the maintenance building (Paint Room). Additional sampling was recommended.
- 4) The regulatory database review did not reveal any significant concerns.

ENTRIX - 1995

ENTRIX, Inc. completed a Phase II ESA (April 1995) on the site in order to evaluate the environmental subsurface condition of the property. Fifteen soil borings were completed across the site at depths of up to 46 feet bgs. Soil samples were obtained and analyzed from various depths within specific soil borings.

ENTRIX concluded that petroleum hydrocarbon impacted soil was present on the northeastern portion of the site near the base of the old landfill area in a circular pattern 40 feet in diameter and 20 feet thick at a depth of up to 30 feet. The highest concentration of impacted soil identified by

ENTRIX was within soil sample B14D, which was 36,000 milligrams per kilogram (mg/kg) at 20 feet bgs. The calculated volume of petroleum impacted soil by ENTRIX was 700 cubic yards.

The analytical reports contained within the ENTRIX document indicated that the TPH present was primarily of longer chain hydrocarbons (C23+). A single point of elevated lead and cadmium impacted soil was identified within the former City landfill area at a depth of 15 feet bgs. ENTRIX concluded that the area of elevated metals was most likely localized and further evaluation was necessary.

3.3 GEO-CAL, INC

GEO-CAL, INC., issued a report in 1998 outlining the work completed in regards to the removal of 3 USTs and associated piping and dispensers. The USTs included two (2) 4,000 gallon gasoline tanks and one (1) 2,000 gallon diesel tank. A total of 12 soil samples were collected and analyzed. Samples were obtained from immediately below each tank (2 per tank), below each dispenser (1 per dispenser), and below the piping trench (1). Three samples were also obtained from the fill material removed from around the tanks.

Soil samples collected from below the gasoline tanks and dispenser were analyzed for total petroleum hydrocarbons-gasoline range (TPHg), for benzene, toluene, ethylbenzene, and total xylenes (BTEX), and for Methyl Tertiary Butyl Ether (MTBE). Soil samples from below the diesel tanks and dispenser were analyzed for total petroleum hydrocarbons-diesel range (TPHd), BTEX, and MTBE. Soil samples from the trench and surrounding removed material were analyzed for TPHg, TPHd, BTEX and MTBE.

The results of all analytical tests were none detected with the exception of the sample below the diesel dispenser. The result for that sample was 15 mg/kg TPHd. The County of Los Angeles, Department of Public Works issued a Closure Certification and a "no further action" required letter for the project on January 13, 1999.

4.0 SITE HISTORY

4.1 General

The past usage of the site and adjoining properties was assessed through a review of Certified Sanborn Fire Insurance maps, historical aerial photographs, topographic maps, and information on file at the City of Hermosa Beach. Copies of the historical references reviewed are included in the Appendices to this report. The following is a summary of historic use of the site and adjoining properties.

4.2 Site Area History and Development

Since the 1920's the site has been identified as being utilized for City Municipal purposes. In the 1920's the oldest building on the site, located near 6th Street was identified as a City Refuse Burner with a City Landfill located on the northeast section of the property. By the 1940s the southern most buildings were slightly expanded with the use identified as a City Garage, the City Landfill was still present to the northeast. In the late 40's to early 50's the Landfill was completely filled in and by 1960 the entire property was identified as a City Service Yard. Post 1960 additional buildings were added along the northern property line of the site. Since that time, the site use continued to be identified as a City Service or City Maintenance Yard, which use is maintained until the present.

The immediately adjoining properties were sparsely developed into the 1940's with a few residential units located to the northwest of the property. Post 1940s significant development ensued with industrial buildings being constructed to the south and west of the site by 1953 and to the north of the site by the 1960's. By 1960 the buildings to the west of the site were identified as containing a building material warehouse, a boat repair shop and a contractors storage yard. By 1960 the building to the south was being utilized as a planter mix manufacturing site.

Since the 1960s the various adjoining buildings have been utilized for multiple small business industrial/commercial uses. Currently the uses can not be fully ascertained however, fiberglass manufacturing is taking place to the north and northwest.

Further to the south, a large parcel was identified as the location of a glass manufacturing plant (Hermosa Glass Co) from the 1920's into the 1950s. To the east a railroad right of way was present from the late 1800s until its conversion to a greenbelt/park during the 1960's.

4.3 Sanborn, Inc. Fire Insurance Maps

Certified Sanborn Maps were provided by EDR, Inc. for 1927, 1946, and 1960. The 1927 Map, as the oldest know reference, identifies the site as a City Dump and Refuse Burner. A Baird Street is present to the west but is labeled as "not in use". Baird St. and properties west of Baird St. are incorporated into the property by the 1960 Sanborn Map. The 1960 Map has the property configured much as it is today. The review of the Sanborn Maps suggests that the site has been utilized for City Maintenance purposes since the 1920's. Copies of the referenced Sanborn Maps are included in Appendix A.

4.4 Aerial Photographs

Historical aerial photographs for the years 1928, 1938, 1947, 1953, 1956, 1969, 1965, 1975, 1986, 1994, and 2005 as provided by EDR were reviewed for indications of past land use that have the potential to have impacted the Site. A copy of the Aerial photos is provided in Appendix B.

The review of the aerial photographs suggests that the site has been utilized for City Maintenance purposes since the 1920's. A dump area on the northeast portion of the property, is present in the photos from 1928 through 1953, but is largely absent in the 1956 photo. The oldest buildings to the central south of the property are present in the earliest photos, with expansion taking place over time into the 1940's. The buildings currently residing along the northern property line are first present in the 1986 aerial photograph.

4.5 Topographic Maps

Historical topographic maps for the years 1896, 1901, 1924, 1934, 1948, 1951, 1963, 1972, 1981 and 1996 as provided by EDR were reviewed. A railroad line that matches the configuration of Valley Drive and the center median greenbelt/park located east of the Site can be seen as early as the 1896 map. The dump area to the northeast of the parcel is present in the 1924 topographic map and is no longer present in the 1963 map. The elevation of adjoining parcels has remained relatively constant since 1924. A copy of the topographic maps reviewed is included in Appendix C.

5.0 ENVIRONMENTAL RECORDS REVIEW

5.1 STANDARD ENVIRONMENTAL RECORDS REVIEW

Brycon, LLC utilized the electronic data base service Environmental Data Resources, Inc. to complete the environmental record review. The database search was used to identify properties that may be listed in the referenced Agency records, located within the ASTM specified search radii. The listings identified in a database are summarized below. For brevity, databases for which no site was identified are not listed below, but are provided in a copy of the report entitled The EDR Radius Map Report with GeoCheck in Appendix D.

Database Name	Search Radius (Mile)	Site Listing	Adjacent Property Listings
FEDERAL DATABASES			
RCRA-SQG (RCRA-Small Quantity Generator)	¼	0	10
RCRA-NonGen (RCRA-Non Generator)	¼	0	1
FINDS (Facility Index System)	TP	1	0
STATE/LOCAL DATABASES			
Envirostor	1	0	5
LUST (Leaking Underground Storage Tank)	½	0	20
SWEEPS UST	¼	1	0
Toxic Pits	1	0	1
HIST CORTESE	½	0	11
NOTIFY 65 (Prop 65 Records)	1	0	1
DRYCLEANERS	¼	0	1
HAZNET (Facility and Manifest Data)	TP	1	0
EMI (Emissions Inventory Data)	TP	1	0
HWP (Hazardous Waste Permit Tracker)	1	0	1
Los Angeles County HMS	TP	1	0

Notes: TP- Target Property. Sites may be listed on more than one database.

5.2 Site

The property address was identified in five of the databases searched by EDR. Information provided for each of the five database listings is summarized below:

- FINDS – Facility Index System. The data base contains information from the National Emissions Inventory database on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs). The site has reported Total Organic Carbon emissions to the South Coast Air Quality Management District in 1993, 1995, 1997, 1998, 1999, 2000, 2001 and 2007.
- HAZNET - The data is compiled by the California Environmental Protection Agency from copies of hazardous waste manifest received each year and is released annually. The database states the following for the site:
 - 1) Recycled “waste oil and mixed oil” in 2008, 2010, 2011 at 2.261, 1.14, and 1.33 tons respectively.
 - 2) Recycled “organic liquid” in 2011 – 0.663 tons.
 - 3) Landfill “latex waister” in 2011 – 1.35 tons.

- EMI – The emissions inventory database (EMI) contains information regarding toxics and criteria pollutant emissions data collected by the California Air Resources Board and local air pollution agencies (South Coast Air Quality Management District in this case). The property was listed and reported Total Organic Carbon emissions in 1990.
- Los Angeles County HMS - The Los Angeles County Hazardous Materials System contains a listing of hazardous waste sites and UST sites within the County jurisdiction. The database contains a reference to removed underground storage tanks at the site.
- SWEEPS UST - The SWEEPS UST database reports USTs onsite with an unknown number and status.

5.3 Nearby Properties

Based upon the database search summarized in Section 5.1, the following table provides additional information regarding the listings of properties located within 1/8 mile of the Site along with the status of each. The listings were determined to not have the potential to impact the Site. Figure 5 provides the mapped locations of each listing along with the location in relation to the Site.

PROPERTY NAME	PROPERTY ADDRESS	Directions and Distance (miles)	Database Listings	Status of the Case/Notes
Jo L. Design	717 Valley Drive	North - 0.05	RCRA-SQS, FINDS, HAZNET	N/A
Shoreline Glassing	717 Valley Drive	North - 0.05	RCRA-SQS, FINDS, HAZNET	N/A
Cypress Auto Body	650 Cypress Ave.	West - .08	RCRA-SQS, FINDS, HAZNET, EMI	N/A

5.4 Orphan Summary

The Orphan Summary in EDR’s report identifies properties that have incomplete address information and therefore could not be accurately plotted. The Orphan Summary lists 9 facilities, some of which appear to be this Site. No additional significant adverse impacts to the Site are expected from the properties listed, other than those already identified in this report. This statement is based upon the information provided in the EDR report for the listed properties, their locations and the databases on which the properties are listed.

5.5 Additional Search

Brycon performed a search of additional readily available environmental record sources. The search distance was extended to one mile from the Site. A summary of our findings is presented below.

5.5.1 GeoTracker Website

The GeoTracker website is maintained by the California State Water Resources Board and contains summary information on well and facilities associated with USTs, leaking underground fuel tanks, SLIC cases, land disposal and non-UST Department of Defense facilities. The Site was not listed on the GeoTracker Website.

There were 25 sites listed within 1 mile of the property on the GeoTracker website. All sites were listed as completed-case closed with the exception of the 3 identified in the table below:

NAME	LOCATION	TYPE	STATUS	Directions and Distance (miles)
Key Centers, Inc	1325 Hermosa Ave	Leaking UST	Open Site Assessment	Northwest -0.38
King Harbor Maintenance Dredge	King Harbor	WDR Site	Historical WDR	South-0.42
SCE-Redondo	1100 Harbor Drive	Clean Up Program	Open-Site Assessment	Southwest-0.75

5.5.2 DOGGR Website

The California Department of Conservation – Division of Oil, Gas and Geothermal Resources maintains a website with the records of oil, gas and geothermal wells drilled in the State of California. Brycon researched wells that were drilled within ¼ mile of the Site. A total of 7 wells were identified. The location and current status is outlined in the table below:

WELL NAME	LOCATION	STATUS
Stinnett #1	On Site	Plugged and Abandoned
Stinnett #7	200 feet west	Plugged and Abandoned
Stinnett #2	700 feet south-southeast	Plugged and Abandoned
Stinnett #3	700 feet south-southeast	Plugged and Abandoned
A.W. Schwarz	780 feet south-southeast	Plugged and Abandoned
Conrock 1	1,125 feet south-southwest	Plugged and Abandoned
O'Donnell 33	1,300 feet south	Plugged and Abandoned

5.5.3 Site Reconnaissance

Based upon the site walk and interviews it was determined that an additional listing should be identified. A fiberglass manufacturer was noted as being present to the northwest of the site. During the site walk, odors from the fiber glass manufacturer were noted. No database records exist as to the volume or type of materials managed by the location.

6.0 SITE RECONNAISSANCE

This section summarizes observations of the Site and surrounding properties made during the site reconnaissance.

6.1 Methodology and Limiting Conditions

Mr. George Paspalof and Mr. Mark Wilson performed the site reconnaissance on May 8 and May 9, 2012. The site reconnaissance was made by walking the interior and exterior areas of all buildings onsite. Brycon was accompanied by a site representative from the City of Hermosa Beach during the reconnaissance of the Site. Ellis Freeman and Keith Ridenour were present during the site walk. We were not accompanied during our reconnaissance of the adjoining parcels.

6.2 Site Conditions Encountered

The existing site is comprised of two primary buildings: 1) a steel frame structure with aluminum/steel frame to the north; and 2) a concrete, brick and stucco building to the south. A small electrical room is located on the eastern side of the property. In the northwest corner a concrete structure has been built to house and segregate sand and gravel. Throughout the Site large container boxes are located which house equipment and items used in the City Maintenance Services.

There are two entrances to the Site, one on Valley Drive to the east and one on 6th Street to the south. The Site is paved with the exception of the southwest corner (within the fence line), which is unpaved. The unpaved area is used for vehicle wash out and for storage of landscaping waste.

The steel frame building contains office, change and break room facilities along its eastern side with the remaining building used for equipment storage. Some maintenance and construction also takes place in various locations within the steel structure. Some miscellaneous staining of concrete floor was observed within the building. This staining appeared to be the result of parking equipment and vehicles within the building. Minor construction debris was present in the middle back section of the building.

The southern building is broken up into sections: 1) a groundskeeper room for storage of mowers and wood chippers; 2) a paint room for painting of municipal signs, paint storage and associated equipment; 3) a vehicle maintenance room, with oil, grease, waste oil, tires and parts; 4) a parts room, for storage of vehicle equipment and parts.

Housekeeping and storage were generally poor in all 4 sections of the southern building. Staining on floors and asphalt just outside of each section were noted. The integrity of flooring and asphalt areas adjoining the building was generally good. Stained areas were previously investigated by ENTRIX. Existing conditions did not appear to have deteriorated since that time.

7.0 INTERVIEWS

Brycon interviewed Mr. Ells Freeman and Mr. Keith Ridenour of the City of Hermosa Beach Public Works Department regarding past and present usage of the Site. Both individuals have worked on the site for at least 15 years. The following information was provided:

7.1 Ells Freeman

According to Mr. Freeman, the site has been utilized in its current configuration for the last 15 years. Some maintenance of city owned vehicles and equipment takes place in the northern most steel building and the southern end of the southern building. He was not aware of any recent or historic spills of fuel, oil or waste oil from these operations. He pointed out that paint and other chemicals are stored in the maintenance section of the southern building.

Mr. Freeman noted that he was aware of two fiber glass manufacturers that operate on adjoining properties, one to the northwest and one to the north. The facility to the northwest has had some odor and dust releases in the past.

Mr. Freeman was also present when underground storage tanks were removed from the site, he pointed at a general area in which they were located. He recalled obtaining a closure report for the removal but could not locate a copy of the report. Mr. Freeman opened up access to the basement area of the southern building for Brycon's inspection. He noted that the area was used for miscellaneous tool storage, mostly landscaping.

7.2 Keith Ridenour

Mr. Ridenour has worked on the property for over 20 years. The site has been utilized for City services during that entire period. Mr. Ridenour performed a walking interview onsite with Brycon personnel. Each room of all buildings was visited and discussed along with waste handling procedures.

A kiln room currently used for storage was entered and Mr. Ridenour represented he understood it was used for glass manufacturing. The integrity of floors in all buildings were reviewed and no known cracks or holes identified.

Mr. Ridenour identified that the site had once been used as a City Landfill. As far as he understood it was primarily solid materials. He did not know the size or depth of the landfill.

8.0 SUMMARY OF FINDINGS

Brycon has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-05, of the approximate 1.3 acre area identified as 555 6th Street in Hermosa Beach, California. The Site is currently used as a City Maintenance Yard and is proposed to be used for a Crude Oil Production facility. Brycon's summary of findings are listed in the table below.

Assessment Category	REC (Y/N)	Recommended Actions
Hazardous Substances/Petroleum Products	Y	Staining of surface and noted landfill issues. Complete a Phase II ESA – REC
Hazardous Waste	Y	Site handling wastes in conformance with applicable laws – NFA
Non-Hazardous Waste	Y	Site handling wastes in conformance with applicable laws – NFA
Aboveground/Underground Storage Tanks	Y	Tanks removed and closed under previous site reports – PHREC
Unidentified Substance Containers	N	NFA
Equipment Potentially Containing PCBs	N	NFA
Wastewater Systems	N	NFA
Evidence of Releases	Y	Surface issues potentially present. Complete a Phase II ESA – REC
Pools of Liquid, Pits, Ponds, Lagoons	N	NFA
Wells	Y	Former Oil Well onsite, identified as plugged and abandoned by DOGGR – NFA
Other Site Issues	Y	Potential lead and asbestos containing material in buildings. Complete a survey prior to demolition - REC
Nearby Properties	N	NFA
Historical Land Use-Site	Y	Former landfill onsite. Complete a Phase II ESA of area - REC
Historical Land Use – Nearby Properties	Y	NA

Notes: REC- Recognized Environmental Condition where additional activities appear to be warranted at this time, NFA- No further action required at this time, PHREC-Potential historical REC where additional activities do not appear warranted at this time.

9.0 CONCLUSIONS AND RECOMMENDATIONS

Brycon has performed a Phase I ESA, in general conformance with the scope and limitations of ASTM E 1527-05, of the approximate 1.3 acre area identified as 555 6th Street in Hermosa Beach, California. Exceptions to, or deletions from this practice are described in Section 1.4 of this report.

The Phase I ESA identified petroleum hydrocarbon impacted soil and the potential for metal impacted soil within the former landfill area of the Site. The landfill was located on the northeastern portion of the property. Brycon recommends the completion of additional soil sampling and analysis to further delineate the horizontal and vertical extent of the petroleum hydrocarbon impacted soils onsite and to evaluate the presence of heavy metals in the soil. After completing the delineation of soil impacts on the Site a remedial action plan (RAP) should be prepared that:

- summarizes the nature and extent of the contamination on the Site,
- evaluates potential remedial actions to reduce the Site risk to acceptable levels,
- selects the most appropriate action, and
- provides a conceptual design and cost for the selected alternative.

The Phase I ESA identified current site operations that may be impacting surface areas of the Site. Brycon recommends the completion of soil sampling and analysis of the surface areas to determine if impacts have occurred. These areas include the vehicle washout area and landscape waste storage area.

Based upon the site reconnaissance, age of onsite structures and comments from Mr. Freeman the potential exists for asbestos containing materials (ACM) and/or lead containing paint (LCP) to be present at the Site. We recommend conducting an ACM and LCP survey prior to any demolition activities to confirm the absence or presence of these materials.

11.0 QUALIFICATIONS

This Phase I ESA report was prepared by Mr. George Paspalof and Mr. Mark Wilson. We declare that, to the best of our knowledge and belief, we meet the definition of environmental professionals as defined in 40 CFR 312.10 and have specific qualifications based upon education, training and experience to assess a property of the nature, history, and setting of the subject property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 10 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 06/13/2012 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 06/14/2012 has revealed that there are 20 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

Toxic Pits: The Toxic Pits Cleanup Act Sites database identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. The data come from the State Water Resources Control Board.

A review of the Toxic Pits list, as provided by EDR, and dated 07/01/1995 has revealed that there is 1 Toxic Pits site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-NonGen site within approximately 0.25 miles of the target property.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

SCE - REDONDO GENERATING STATION (Continued)

S104404832

Description: Per. NRC report: Caller is reporting a type of oil that came from a generator that was being used in the production of a movie. Caller states that the oil traveled down the street and into a storm drain. Caller reports that cleanup has been initiated. Absorbants and booms applied and release secured. The fire dept. was on scene and were satisfied with the clean up process.

Environmental Interest/Information System

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

GREENHOUSE GAS REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/08/2012	Source: EPA
Date Data Arrived at EDR: 05/10/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 5	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/30/2012	Source: EPA
Date Data Arrived at EDR: 04/05/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 40	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/30/2012	Source: EPA
Date Data Arrived at EDR: 04/05/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 40	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810

Number of Days to Update: 14	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 04/12/2012
Number of Days to Update: 36	Next Scheduled EDR Contact: 07/23/2012
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/28/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/15/2012

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/30/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/30/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 06/11/2012
Number of Days to Update: 11	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/30/2011	Source: Environmental Protection Agency

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 06/13/2012	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/14/2012	Telephone: 916-323-3400
Date Made Active in Reports: 07/06/2012	Last EDR Contact: 06/14/2012
Number of Days to Update: 22	Next Scheduled EDR Contact: 08/20/2012
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/27/2011	Source: Environmental Protection Agency

INDIAN ODI: Report on the Status of Open Dumps on Indian Lands

Location of open dumps on Indian land.

Date of Government Version: 12/31/1998	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/03/2007	Telephone: 703-308-8245
Date Made Active in Reports: 01/24/2008	Last EDR Contact: 05/07/2012
Number of Days to Update: 52	Next Scheduled EDR Contact: 08/20/2012
	Data Release Frequency: Varies

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/02/2012	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/13/2012	Telephone: 202-307-1000
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 06/04/2012
Number of Days to Update: 93	Next Scheduled EDR Contact: 09/17/2012
	Data Release Frequency: Quarterly

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

	Data Release Frequency: Varies

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 07/15/2011	Telephone: 301-415-7169
Date Made Active in Reports: 09/13/2011	Last EDR Contact: 06/11/2012
Number of Days to Update: 60	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Quarterly

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/10/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/12/2012	Telephone: 202-343-9775
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 07/11/2012
Number of Days to Update: 49	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/23/2011	Source: EPA
Date Data Arrived at EDR: 12/13/2011	Telephone: (415) 947-8000
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 06/12/2012
Number of Days to Update: 79	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/21/2012	Source: Department of Energy & Environmental Protection

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Longitude (West):	118.3947 - 118° 23' 40.92"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	370981.7
UTM Y (Meters):	3747159.0
Elevation:	71 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	33118-G4 REDONDO BEACH (DIGITAL), CA
Most Recent Revision:	Not reported

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

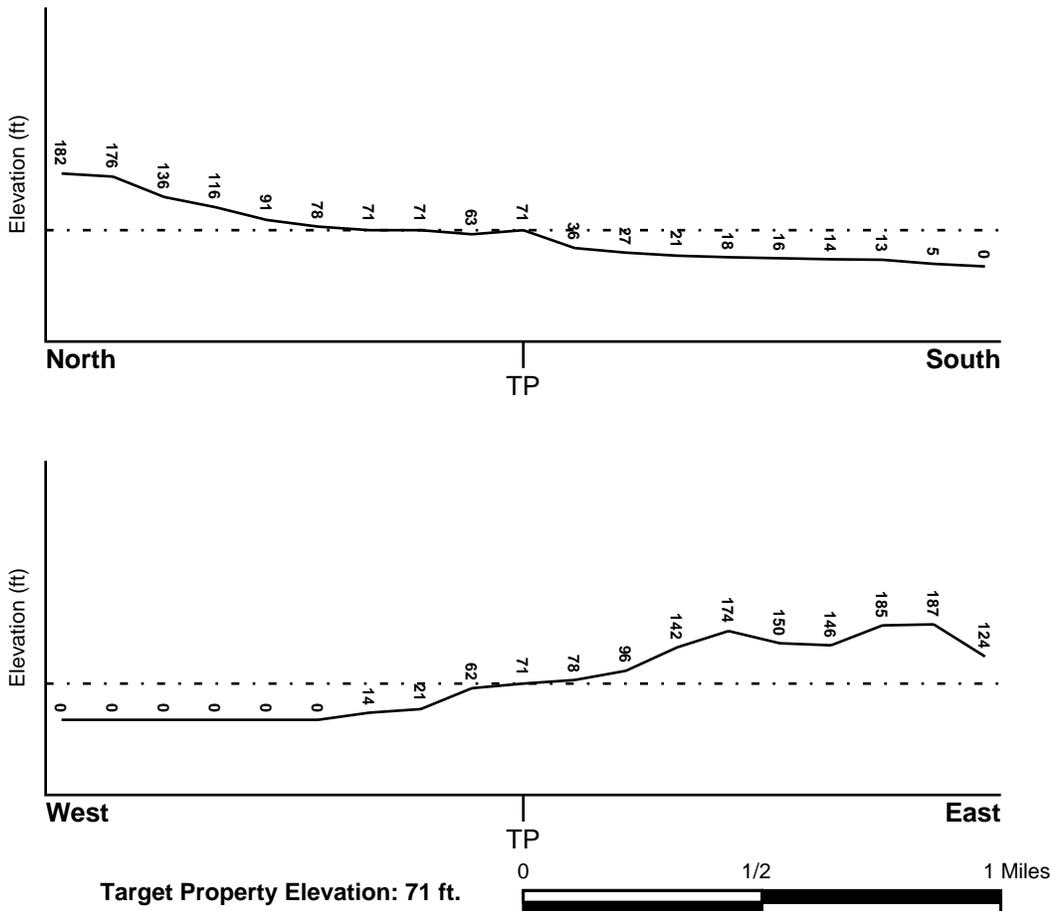

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
LOS ANGELES, CA

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: DELHI

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	10 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
2	10 inches	30 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
3	30 inches	50 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
4	50 inches	70 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand
clay

Surficial Soil Types: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

clay

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sandy clay loam
 sandy clay

Deeper Soil Types: coarse sand
 silty clay loam
 gravelly - fine sandy loam
 stratified
 gravelly - sandy loam
 weathered bedrock
 clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
