As in all statistical comparisons, caution should be exercised in interpreting percent changes. When smaller numbers are compared the result is a greater percentage change; in other words, a more dramatic result is achieved.

*Due to change in reporting processes there may be a variation in previously reported statistics

N.C. Not Calculable. To calculate the percentage change you use Time 1 - Time 2/Time2= a number x100= Percentage change. You cannot divide any number by 0 and receive a valid number
