

You Asked - We Got 'Em!

"Discounted to Hermosa Beach residents"

Compost & Worm Bins

Compost bin
12 cubic feet
28"x 28"x 34" high

What Is Composting?

Composting is nature's way of recycling organic material such as leaves, grass clippings, twigs, fruit and vegetable trimmings into a dark, crumbly, sweet smelling soil conditioner. Compost bins are great for yards.

What is Worm Composting?

Vermi-composting, uses red wiggler worms to break down kitchen scraps into a super rich fertilizer. Great for small spaces like we have in Hermosa Beach!

Why do Composting?

- Save money, replace store-bought soil conditioners.
- Create natural fertilizer for your garden and plants.
- Save water - helps the soil hold moisture.
- Recycle, keep organics out of our landfills!

Compost bin: \$35
Worm bin & worms: \$70
One per Hermosa residence
